REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The instant invention has been deemed an unobvious improvement over U.S. 6,658,842 to Yamasaki et al and DE 4439454 to Ende. Yamasaki et al (Fig. 1) and Ende (Fig. 2) each disclose a hydraulic system wherein fluid is delivered from a reservoir via a hydraulic pump to a consumer having a piston space and at least two fluid delivery lines such that in a non-actuated condition a first fluid delivery line is connected to the reservoir and a second pressure delivery line is connected to the pump, and in an actuated condition the first fluid delivery line is connected to the pump and the second delivery line is connected to the reservoir. The unobvious improvement includes that in the actuated condition the both the first and second fluid delivery lines are connected to the pump delivering fluid to the pressure space at the same pressure.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
